**Senior Solutions Architect • Technical Sales • Business Consultant**

Senior Solutions Architect with 8+ years in customer-facing pre-sales and post-sales technical roles and 16 years in B2B SaaS. Translates complex technical solutions and system architecture into clear business value for C-suite executives and clients. Expertise includes discovery, technical demonstrations, proofs of concept, RFI/RFP responses, and serving as the technical liaison between Sales, Product, and Engineering to ensure seamless delivery and client adoption.

## EXPERIENCE

**Senior Business Consultant** | Entrata, Lehi, UT **June 2025 – Present**

*Entrata is a global leader in property management software, offering a comprehensive SaaS platform that automates workflows for rent payments, leasing, maintenance, and resident communication.*

- Serve as a Subject Matter Expert for the Entrata Business Intelligence product, providing high-level post-sales consulting to multifamily housing clients.
- Consult with client business teams to configure software according to specific operational needs, ensuring successful implementation and long-term product adoption.
- Lead performance measurement analyses regarding financial results, leasing velocity, and market conditions to demonstrate the value proposition of business intelligence.
- Train clients on business intelligence concepts and best practices, enabling self-sufficiency within the Entrata platform.
- Collaborate with cross-functional teams (sales, product, engineering, support) to define business consulting processes and improve the client experience.

**Senior Solutions Architect** | Pallet, San Francisco, CA **Sep 2024 – Mar 2025**

*Pallet is a modern SaaS, AI-powered logistics platform for transportation and warehouse management.*

- Technical expert providing pre-sales and post-sales consultation for Pallet's logistics TMS software, including in-depth client audits and product discovery to uncover product gaps and opportunities.
- Prepared detailed Statements of Work (SOWs) outlining project scope, deliverables, timelines, and budgets, ensuring clear expectations and alignment with client objectives.
- Created and tracked product requirements and user stories for new modules, ensuring alignment with customer needs and business goals.
- Partnered with clients and internal stakeholders to optimize onboarding, reducing onboarding time by 2 months and increasing customer satisfaction and retention.
- Drove revenue growth by providing critical sales support for a portfolio of clients ranging from $10K to $200K ARR, partnering with C-suite executives to align product strategy with key business objectives.

**Senior Solutions Architect** | SmartRent, Scottsdale, AZ **Oct 2021 – Sep 2024**

*SmartRent is an enterprise SaaS smart home automation and IoT platform for the multifamily industry.*

- Orchestrated cross-functional alignment between $10M+ ARR clients and product/engineering to deliver platform enhancements that increased product adoption and expanded wallet share.
- Leveraged customer insights and usage data to drive product improvements, achieving hardware uptime of approximately 95% and decreasing escalated hardware support inquiries.
- Facilitated third-party API integrations as the central point of contact, managing partner–engineering communication, maintaining API documentation, and contributing to API product development.
- Drove feature development and rollout of new smart home IoT capabilities across 100K+ units, impacting end-user satisfaction and system performance.
- Spearheaded a customer feedback loop using Jira Service Desk, improving product iteration cycles and aligning roadmaps with real-world needs.

**Product Manager** | Nextmune, Mesa, AZ **Apr 2021 – Oct 2021**

*Nextmune provides veterinary allergy testing and treatment for dogs, cats, and horses.*

- Managed concurrent custom ERP implementation projects across supply chain, manufacturing, services, CRM, and ordering, delivering on time with requirements documented across business units.

**Solutions Architect** | OptimumHQ, Mesa, AZ **Apr 2018 – Apr 2021**
*OptimumHQ provides a no-code custom ERP platform for SMBs.*

- Served as a technical expert, providing both pre-sales and post-sales consultation for OptimumHQ's platform.
- Owned the complete project lifecycle from discovery, design, requirements, and architecture to turning user stories into functional systems.
- Designed and implemented custom front-end and back-end business workflows for multiple clients on the OptimumHQ low-code platform.

**Data Analyst** | SmartPractice, Phoenix, AZ **Dec 2010 – Apr 2018**
*SmartPractice provides patient communications, marketing, and services to dental & dermatology practices.*

- Designed and developed standard and custom reports/dashboards using Cognos, Excel, Access, and Sybase SQL, providing actionable insights to marketing, data, sales, and product teams.
- Increased data accuracy by implementing data validation and quality control processes.

## AI-ASSISTED PRODUCT DEVELOPMENT (SIDE PROJECTS)

**Product Owner & Developer** | SMARTDraft, smartdraft.app **2026 – Present**
*A solo side project: sole owner of product, code, infrastructure, and support.*

- Designed, built, and shipped a real-time fantasy football draft platform used by 100+ drafters in the 2026 season, owning the full lifecycle: discovery, requirements, architecture, build, release, and user feedback loop.
- Delivered live multiplayer draft rooms over WebSockets, an automated nightly ingestion pipeline normalizing player/ADP data from multiple third-party sources, and an auto-draft bot that covers absent drafters.
- Built on TypeScript, Next.js, Node, and PostgreSQL; self-hosted with Docker and GitHub Actions, with CI gates, database migrations, and controlled production releases (∼1,150 commits).
- Developed by directing Claude Code AI agents — writing the specs, plans, and reviews a coding agent executes against, then verifying the output.

**Claude-Powered Internal Tools**

- Household finance app with an LLM chat agent (Anthropic API, tool use) that answers questions and performs bulk data operations against a live transaction database.
- Meal-planning app with AI-generated recipes and weekly plans; open-source Claude Code tooling and reusable agent skills published on GitHub.

## SELECT PRODUCT ACHIEVEMENTS

- Oversaw development of a System Health Dashboard for enterprise clients, acting as Product Manager from concept through launch — real-time hardware status insights, ∼95% hardware uptime, fewer escalated support calls, and improved customer satisfaction and trust.
- Supported multiple new hardware and software products through development, testing, go-to-market, and rollout, increasing total unit count by 100K+ and annual recurring revenue (ARR) by $400K+.
- As Solutions Architect, architected and personally built roughly half of a custom ERP for a veterinary allergy lab (Nextmune): customer portal, order entry, lab-equipment integration, manufacturing, warehouse fulfillment, shipping, billing, and accounting integration.

## CERTIFICATIONS

**Certified Scrum Product Owner (CSPO)**, Scrum Alliance • **Certified ScrumMaster (CSM)**, Scrum Alliance • Agile (Scrum, Kanban), Waterfall, Lean

## EDUCATION

**Associate's in Business**, Rio Salado Community College, Tempe, AZ **May 2018**

## SKILLS

Stakeholder Management • Technical Proficiency (Jira, Git, REST APIs, HTML, JS, CSS) • AI-Assisted Development (Claude Code, agentic workflows) • LLM Application Design (Anthropic API, tool use) • Discovery & Requirements Gathering • PDLC • Agile & Scrum • Data Analysis & Reporting (SQL, Excel, BI Tools) • SaaS

**Software:** Jira, Git, Claude Code, Anthropic API, Next.js, PostgreSQL, Docker, GitHub Actions, Datadog, Postman, Cloudflare, Domo, Twilio, Swagger, Retool, Splunk, Excel, Access, IBM Cognos BI, IBM SPSS
